

## Introduction:

What question are you trying to answer?

What information did you gather to help with your hypothesis?

What was your hypothesis?

## Procedure/materials

What materials did you use?

How did you conduct your experiment?

## Data

Was your hypothesis correct or not?

What were your results?

## Conclusion

Restate your question and hypothesis.

Why do you think that the results came out the way that they did?

What questions do you still have?
